DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,715,893 to Houck.

The Houck '893 patent discloses an agricultural seeder having a wheel supported main frame (22), first (40) and second (41) elongated wings, a plurality of seeders mounted on the wings (see col. 2, line 37, and col. 6, line 66 – col. 7, line 2), a first (35) and second (36) elongated support arms pivotally connected at one end to the main frame and at the other end to the center of the wings, and first (158) and second (159) hydraulic cylinders. The hydraulic cylinders move the wings between a raised (Fig. 9), transport position and a lowered (Fig. 5) working position. Since the hydraulic cylinders are a part of a conventional hydraulic control unit, the cylinders operate in unison, as is inherent with conventionally hydraulically controlled winged implements. In the working position, the wings follow the ground contours. See col. 6, lines 10-12.
